Company: Anz Banking Group

Location: Melbourne

Category: other-general

Tech Area Architect - Wholesale Digital About the role At ANZ our purpose is to shape a world where people and communities thrive. We're making this happen by improving our customers' financial wellbeing so they can achieve incredible things - be it buying their home, building a business or saving for things big or small. We are looking for a Technical Solution Architect to support our institutional digital banking solutions that integrate across payments and core banking systems. You will be responsible for maintaining the technical vision, architecture and roadmap for the system landscape, as well as delivering solution architecture for ongoing feature demand. To be successful in this role, you should have extensive experience in designing and developing complex software solutions in the financial services industry, preferably in the digital banking, payments or core banking domains. You should also have strong knowledge of various technologies, such as web and mobile applications, cloud computing, data analytics, APIs, microservices, blockchain and artificial intelligence. You should be able to communicate effectively with both technical and non-technical audiences. What will your day look like You will work closely with business stakeholders, product owners, developers, testers and other architects to understand the requirements, challenges and opportunities of the Wholesale Digital Tech Area. You will also collaborate with external partners, vendors and regulators to ensure compliance, security and interoperability of the solution. Define the technical vision, architecture and roadmap for Wholesale Digital Design software components that integrate with payments and core banking systems Evaluate and select appropriate technologies, tools and frameworks Ensure the quality, performance, scalability, security and reliability of the platform Provide technical

leadership and guidance to Architects and development teams Resolve technical issues and risks as they arise Stay updated with the latest trends and best practices in digital banking What will you bring? We know not everyone will bring all of the skills and experience, and at ANZ we are focused on people bringing a growth mindset to their approach to work. Some of the skills we are looking for are below, but don't worry if you don't have all of these as learning on the job is the way we work. But back to some of the skills - Many years of experience in software development and architecture Proven track record of designing and delivering successful software solutions in the financial services industry, preferably in the digital banking space Expertise in various technologies, such as web and mobile applications, cloudputing, data analytics, APIs, microservices, blockchain and artificial intelligence Familiarity with various standards, regulations and protocols in the financial services industry, such as ISO 20022, Open Banking, SWIFT and NPP Excellentmunication, presentation, leadership and problem-solving skills So, why join us? From the moment you join ANZ, you'll be doing meaningful work that will shape a world where people andmunities thrive. But it's not just our customers who'll feel your impact. You'll feel it too. Because at ANZ, you'll have the resources, opportunities, and support you need to take the next big step in your career. We're a diverse bunch at ANZ in different roles, different locations, doing different things. That's why we have a range of flexible working arrangements, so our people can make work, work for them. We also provide a range of benefits including access to health and wellbeing services and discounts on selected products and services from ANZ and more. At ANZ you'll be part of an organisation where the different backgrounds, perspectives and life experiences of our people are celebrated. That's because we'remitted to building a workplace that reflects the diversity of themunities we serve. We wee applications from everyone and encourage you to talk to us about any adjustments you may require to our recruitment process or the role itself. If you are a candidate with a disability or access requirement, let us know how we can provide you with additional support.
